## GENERAL

Ministerial Instructions

The following is a list of English translated instructions issued by the various Bureaus of the Ministry of Welfare to the prefectural governments for the periods indicated:

11 - 23 July 1949

Date	File Number	Subject	To	From
<u>Account Section</u>				
July 11	Kai-hatsu No. 696	Re: Specifications along with the last payment report.	Governor, Shimane Prefecture.	Chief, Accounts Section
July 11	Kai-hatsu No. 698	Re: Copy of the checkup on the last month account relative to the report of the settlement of account of expenditure for 1949.	Governors, Kanagawa & 8 other Prefectures.	"
July 12	Kai-hatsu No. 704	Re: Field examination of accounts.	Governors, Wakayama & Nara Prefs.	"
July 13	Kai-hatsu No. 707	Re: Field examination of accounts.	Governors, Niigata & Toyama Prefs..	"
<u>Public Sanitation Bureau</u>				
July 12	Ei-hatsu No. 723	Re: Handling of the indications on exported foodstuffs.	All pre- fectural governors.	Director, Public Sanitation Bureau
July 12	Ei-hatsu No. 728	Re: Instruction of temporary operation of the anti-smallpox vaccination & the Cabinet Order on the enforcement date for part of preventive vaccinations.	"	"
July 13	Ei-hatsu No. 733	Re: Mass control of additional articles to manufactured goods to be examined officially.	"	"

Date	File Number	Subject	To	From
July 14	Ei-hatsu No. 738	Re: Setup of communicable diseases wards, disinfecting equipments and V.D. Hospitals for 1950.	All pre- fectural governors.	Director, Public Sanitation Bureau
July 15	Ei-hatsu No. 741	Re: Joint responsibility for the expenditure of the preventive vaccinations for 1949.	"	"

Medical Affairs Bureau

July 15	I-hatsu No. 618	Re: Documents for approval of compensation for public servants' disasters.	All chiefs, Bureau's local of- fices, National Hospital & sanatoriums.	Director, Medical Affairs Bureau
---------	--------------------	--	--	---

Pharmaceutical and Supply Bureau

July 11	Yaku-hatsu No. 1252	Re: Disposal of ration articles on hand of local dealers who fail to make renewal of the registration.	All pre- fectural governors.	Director, Pharmaceu- tical and Supply Bureau
July 11	Yaku-hatsu No. 1256	Re: The monthly report on violation of the law concerning narcotics.	"	"
July 11	Yaku-hatsu No. 1259	Re: The badge of pharmaceutical agents	"	"
July 12	Yaku-hatsu No. 1262	Re: Report on the violation cases of the law concerning narcotics.	"	"
July 13	Yaku-hatsu No. 1265	Re: Distribution of hexylresorcinol.	"	"
July 14	Yaku-hatsu No. 1275	Re: Quantity of the samples to be submitted for the assay of the Biological Preparations.	"	"
July 15	Yaku-hatsu No. 1283	Re: Distributing quantity of DDT preparations & anti-eruptive typhus vaccine, and the results of collecting the charges.	"	"

Date	File Number	Subject	To	From
July 16	Yaku-shu No. 544	Re: Handling part of medical supplies as the result of the revision of the Temporary Limited Construction Regulation.	All pre- fectural governors.	Director, Pharmaceu- tical and Supply Bureau

Social Affairs Bureau

July 12	Sha-hatsu No. 1124	Re: Special allocation of leather shoes for Welfare Commissioners.	Governors, Gumma & 2 other Prefectures.	Director, Social Affairs Bureau
July 12	Sha-hatsu No. 1126	Re: Special distribution of milk.	Governor, Kanagawa Prefecture.	"
July 14	Sha-hatsu No. 1132	Re: Consultation for approval of security facilities provided by the Daily Life Security Law, Article 7.	Governor, Osaka Prefecture.	"
July 14	Sha-hatsu No. 1133	Re: Interpretation of Article 8 of the Enforcement Regulation of the Daily Life Security Law.	"	"
July 14	Sha-hatsu No. 1134	Re: Interpretation of Article 8 of the Enforcement Regulation of the Daily Life Security Law.	Governor, Gumma Prefecture.	"
July 14	Sha-hatsu No. 1135	Re: Approval of security facilities provided by the Daily Life Security Law.	Governor, Aichi Prefecture.	"
July 14	Sha-hatsu No. 1136	Re: Approval of security facilities provided by the Daily Life Security Law.	Governor, Hokkaido Prefecture.	"
July 14	Sha-hatsu No. 1137	Re: Consultation for approval of security facilities provided by the Daily Life Security Law, Article 7.	Governor, Hyogo Prefecture.	"
July 14	Sha-hatsu No. 1142	Re: Allocation of hemp for the operation of the workshops for the 2nd Quarter period.	Governors, Kyoto & 4 other Prefectures.	"

Date	File Number	Subject	To	From
July 14	Sha-hatsu No. 1143	Re: Guidance and supervision of enforcement business of the Daily Life Security Law.	Governors, Gumma & 3 other Prefectures.	Director, Social Affairs Bureau
July 14	Sha-hatsu No. 1144	Re: Special distribution of IARA goods.	Governor, Fukuoka Prefecture.	"
July 15	Sha-hatsu No. 1146	Re: Overpayment of allowance for funeral services provided by the Daily Life Security Law.	Governor, Shimane Prefecture.	"
July 14	Sha-otsu hatsu No. 180	Re: Approval of the setup of the Consumer's Livelihood Co-operative Association.	All pre-fectural governors.	"

Children's Bureau

July 11	Ji-hatsu No. 609	Re: Allocation of soft balls for a game of baseball to the Child Welfare Agencies.	Governor, Wakayama Prefecture.	Director, Children's Bureau
July 11	Ji-hatsu No. 612	Re: Exemption from payment of expenses for working the day-nurseries.	All pre-fectural governors.	"
July 11	Ji-hatsu No. 614	Re: Holding the nationwide training courses for the child education staff.	"	"
July 12	Ji-hatsu No. 616	Re: Mediation for distribution of canvas-shoes for fatigue and recreation to the Child Welfare Agencies.	"	"
July 14	Ji-hatsu No. 618	Re: Distribution of textile for mattress to the Child Welfare Agencies.	"	"
July 13	Ji-hatsu No. 620	Re: Report on approval of the Child Welfare Agency.	Governor, Mie Prefecture.	"
July 13	Ji-hatsu No. 621	Re: Holding lecture courses for the Child Welfare Workers.	Governor, Kyoto Pref.	"

Date	File Number	Subject	To	From
July 13	Ji-otsu-hatsu No. 36	Re: Distribution of powdered milk as ration food to the Child Care Agencies.	All pre- fectural governors.	Director, Children's Bureau
<u>Insurance Bureau</u>				
July 13	Ho-hatsu No. 68	Re: Point system on medical fees under Social Insurance.	"	Director, Insurance Bureau
July 16	Ho-hatsu No. 69	Re: Adequate operation of the Seamen's Insurance Law.	Chief, Pref., Insurance Division & local of- fices of social insurance.	"
<u>Repatriation Relief Agency</u>				
July 11	En-i No. 766	Re: Supply of medicines etc., for emergency medical care on the repatriation trains.	Governor, Akita Prefecture.	Director, Repatria- tion Relie Bureau
July 11	En-i No. 767	Re: Supply of medicines for medical care on the repatriation trains.	Governor Hokkaido.	"
July 12	En-go No. 770	Re: Revision of register number on foreign nationals for Koreans to be repatriated.	Governor, Miyagi Prefecture.	"
July 14	En-shi No. 784	Re: Outline of transactions by the Prefectural Peoples Financing Bank on the loan of rehabilitation fund.	All pre- fectural governors.	"
July 14	En-shi No. 785	Re: Over-defrayment of distribution charges on special allocation of utensils for 1947.	Governors, Aomori & 12 other Prefectures.	"
July 15	En-shi No. 790	Re: Application for the national treasury's subsidy on accommodation expenditure for repatriates in 1949.	All pre- fectural governors.	"
July 15	En-go No. 792	Re: Dispatching the certificates for riding the repatriation trains.	"	"

Date	File Number	Subject	To	From
<u>Accounts Section</u>				
July 18	Kai-hatsu No. 714	Re: Request on sending documents concerning the custody and transfer of the property of the defunct Mutual Aids Foundation.	Governors, Miyagi & 14 other Prefectures.	Chief, Accounts Section
July 18	Kai-hatsu No. 715	Re: Results of the examination of properties lost or damaged.	Civil Welfare Division Chief, Ishikawa Pref.	"
July 18	Kai-hatsu No. 721	Re: Reply to the request for sending the list of break-downs of budget for 1949 - 50.	Governor, Kochi Prefecture.	"
July 21	Kai-hatsu No. 728	Re: Field examination of accounts.	Governors, Kyoto & Osaka Pref.	"
<u>Public Sanitation Bureau</u>				
July 22	Ei-hatsu No. 750	Re: Revised working points of confirming business on raw hides.	All pre- fectural governors.	Director, Public Sanitation Bureau
<u>Medical Affairs Bureau</u>				
July 20	I-hatsu No. 633	Re: Relating points on Article 25 & 26 of the Medical Treatment Law.	"	Director, Medical Affairs Bureau
July 20	I-hatsu No. 634	Re: Giving refuge and relief to patients.	Chiefs, Bureau's Local Of- fices, National Hospitals & National Sanatoriums.	"
July 21	I-hatsu No. 639	Re: Countermeasures to control Japanese B encephalitis.	"	"
July 21	I-hatsu No. 642	Re: The treatment of patients "B" grade.	"	"

Date	File Number	Subject	To	From
<u>Pharmaceutical and Supply Bureau</u>				
July 18	Yaku-hatsu No. 1293	Re: Prefectural allocation of rubber shoes for laborers at medical factories for the fourth quarter of 1948.	All pre-fectural governors.	Director, Pharmaceutical and Supply Bureau
<u>Social Affairs Bureau</u>				
July 18	Sha-hatsu No. 1148	Re: Consultation of approval for the facilities relative to the Daily Life Security Law.	Governor, Saga Prefecture.	Director, Social Affairs Bureau
July 18	Sha-hatsu No. 1149	Re: Allocation of shoes for the 1st quarter of 1949.	Governors, Iwate & 2 other Prefcs.	"
July 18	Sha-hatsu No. 1150	Re: Advice on allocation of the lining cloth for children's overcoats.	Governor, Hyogo Prefecture.	"
July 18	Sha-hatsu No. 1151	Re: Overpayment of the basic allowance under the Daily Life Security Law.	Governor, Shizuoka Prefecture.	"
July 18	Sha-hatsu No. 1158	Re: Sending the certificate of Cokes allocation for repairing artificial limbs for 2nd quarter of 1949.	Governor, Miyazaki Pref.	"
July 19	Sha-hatsu No. 1160	Re: Altered plans for setups of the facilities relative to the Daily Life Security Law for 1948 - 49.	Governor, Nara Prefecture.	"
July 19	Sha-hatsu No. 1161	Re: Altered plans on the accommodation facilities for the needy repatriates who returned home in 1948.	"	"
July 20	Sha-hatsu No. 1163	Re: Allocation of materials for working the workshops.	Governors, Fukuoka & 6 other Prefectures.	"

Date	File Number	Subject	To	From
July 20	Sha-hatsu No. 1165	Re: A lump sum allowance of the Daily Life Security Law.	Governor, Kanagawa Prefecture.	Director, Social Affairs Bureau
July 22	Sha-hatsu No. 1173	Re: The tenth revised basic allowances for daily life security.	Governor, Hyogo Pref.	"
July 22	Sha-hatsu No. 1174	Re: Expenses for working the examination agency on medical care under the Daily Life Security Law.	Governor, Hiroshima Prefecture.	"
July 22	Sha-hatsu No. 1175	Re: A lump sum allowance of the Daily Life Security Law.	Governor, Kyoto Prefecture.	"
July 22	Sha-hatsu No. 1176	Re: A lump sum allowance of the Daily Life Security Law.	Governor, Kagawa Pref.	"
July 22	Sha-hatsu No. 1177	Re: Comfort money for the casualties suffering from accidents caused by the Occupation Forces.	Governor, Hyogo Prefecture.	"
July 20	Sha-otsu-hatsu No. 181	Re: Allocation of rayon for working the Workshops.	All prefectural governors.	"
July 22	Sha-otsu-hatsu No. 182	Re: Operating medical care under the Daily Life Security Law.	"	"

#### Children's Bureau

July 18	Ji-hatsu No. 626	Re: Questions and answers on the Foster Parents System in operation.	"	Director, Children's Bureau
July 19	Ji-hatsu No. 628	Re: Allocation of pait-stuff for the 2nd quarter of 1949 - 50.	Governors, Hokkaido & 12 other Prefectures.	"
July 19	Ji-otsu-hatsu No. 38	Re: The investigation of nationwide mass concourir of healthy babies.	All prefectural governors.	"

Date	File Number	Subject	To	From
July 21	Ji-hatsu No. 635	Re: National subsidy for the set-ups of the facilities for mentally handicapped children.	Governor, Nagano Prefecture.	Director, Children's Bureau
July 20	Ji-hatsu No. 630	Re: Personnel of national public servants of the staff of the prefectural reformatries.	All pre-fectural governors.	"
July 21	Ji-hatsu No. 637	Re: Allocation of transformers for the 2nd quarter of 1949 - 50.	Governor, Chiba Pref.	"

#### Insurance Bureau

July 18	Ho-hatsu No. 70	Re: The regulations concerning payment and revenue of the national treasury at the Post Offices.	All prefs. & Chiefs, Bureau's Local Of-fices.	Director Insurance Bureau
July 19	Ho-hatsu No. 71	Re: Summary reports and investigations on the National Health Insurance.	All pre-fectural governors.	"

#### Repatriation Relief Agency

July 18	En-shi No. 795	Re: Returning the balance sum of the national subsidy on emergency allocation of utensils.	Governors, Aomori & 8 other Prefectures.	Director, Repatria-tion Relie Bureau
July 19	Embutsu No. 798	Re: Allocation of sugar etc., for making candy to be sold to repatriates.	Governor, Kyoto Prefecture.	"
July 19	Engo No. 803	Re: Re-issuance of the certificate on repatriation.	"	"
July 19	En-i No. 805	Re: Supplying medical goods to the repatriation trains.	Governor, Kagoshima Prefecture.	"
July 19	Engo No. 806	Re: The identification card for accompanying person to repatriates on the train and the after payment certificate of train fare.	Governors Hokkaido & 28 other Prefectures.	"

Date	File Number	Subject	To	From
July 21	Engo No. 810	Re: The specification of the repatriation trains.	All prefectural governors.	Director, Repatriation Relief Bureau
July 21	Engo No. 811	Re: Demand for advancement of the special allowance to Japanese POW abroad.	Chiefs Civil Welfare Division, all prefs.	"
July 23	Engo No. 817	Re: Koreans who have given approval of repatriation by the GHQ, SCAP.	Governor, Shizuoka Prefecture.	"

## SECTION II

### PREVENTIVE MEDICINE DIVISION

#### Insect and Rodent Control

The following article appeared in the publication "News Release" of the American Medical Association (for release in United States papers on 8 July 1949) concerning the use of DDT in the control of diseases carried by rat fleas.

This article gives weight and support to the control measures used in Japan for the past three and a half years in the prevention and control of flea-borne diseases, particularly endemic typhus fever and plague.

It is suggested that the source of this information and the information contained in the article be widely publicized among the Japanese public, all prefectural and city public health departments, health centers, medical associations and other groups interested in the betterment of public health and in the prevention of insect-borne diseases.

#### "USE DDT TO CONTROL DISEASES CARRIED BY RAT FLEAS"

CHICAGO -- DDT dusting is reported superior to any other method now in use for the rapid control of murine typhus (a contagious fever) and other diseases carried by rat fleas, according to an editorial in the current (July 9) Journal of the American Medical Association.

The editorial says:

"In the United States, murine typhus, according to Assistant Surgeon General C. L. Williams (of the United States Public Health Service, Washington, D. C.), constitutes an important problem in nine states grouped in the Southeast.

"These states are: North Carolina, South Carolina, Georgia, Florida, Tennessee, Alabama, Mississippi, Louisiana and Texas. Ninety-two per cent of the human cases of murine typhus in the United States are reported in these nine states. Despite the rat destruction and rat-proofing programs, a steady rapid increase has taken place, moving from 1,882 cases in 1940 to 5,401 in 1944.

"In 1944, personnel of the United States Public Health Service carried out experiments on the control of rodent ectoparasites, using DDT mixed with an inert powder to dust rat runs in buildings. Results indicated that flea indexes in buildings could be reduced by as much as 90 percent and could be kept at a low level for about three months.

"A flea control project was begun in 1945, federal funds for that purpose being made available. The program was carried on by state health departments according to a uniform pattern established in agreement with the Public Health Service. As the result of this campaign there was a progressive reduction in the incidence of the disease.

"In 1944 there were 5,401 cases of murine typhus reported in the United States. In 1945 there were 5,193, in 1946 there were 3,365 and in 1947 the number was 2,034 which represents an over-all decline of about 62 percent. The steady decline has continued into 1948, present data indicating that there will be reported between 1,100 and 1,200 cases.

"The material used is a dust mixture of 10 percent DDT to 90 percent pyrophyllite. This dust is spread along rat runs, in burrows and, so far as practicable into rat harborages. The theory of operation is not to dust the rats themselves but to kill the fleas when they drop off the rats. Apparently rats carry the dust in which they have walked to their nest where additional fleas are killed. Through this method, two main types of rat fleas (*Xenopsylla cheopis* and *Leptopsyllais segnis*) have been greatly reduced in numbers.

"In addition to the reduction in rat fleas, incidence in rats of a positive complement fixation test for typhus also decreased. The author believes that DDT dusting is superior to any other method now in use for the rapid control of any disease carried solely or principally by rat fleas."

### SECTION III

#### VETERINARY AFFAIRS DIVISION

##### Animal Diseases

The Animal Hygiene Section, Ministry of Agriculture and Forestry reported the following outbreaks of animal disease during the period 23 - 29 July.

<u>Prefecture</u>	<u>Disease</u>	<u>Number of Cases</u>
Gumma	Swine erysipelas	1
Shizuoka	Swine erysipelas	2
Chiba	Swine erysipelas	6
Tokushima	Swine cholera	1
Iwate	Swine cholera	5
Tochigi	Equine encephalomyelitis	1 (positive)
Tochigi	Equine encephalomyelitis	1 (suspect)
Yamagata	Equine encephalomyelitis	1 (positive)

#### Monthly Animal Disease Report

The Animal Hygiene Section, Ministry of Agriculture and Forestry, reported the following outbreaks of animal diseases for the months of May and June.

<u>Diseases</u>	<u>May</u>	<u>June</u>
Anthrax	2	0
Swine paratyphus	12	32
Blackleg	0	2
Swine erysipelas	210	382
Swine cholera	392	100
Swine plague	9	8
Piroplasmosis	0	1
Trypanosomiasis	0	1
Brucellosis	29	12
Trichomonas	273	80
Strangles	12	56
Equine infectious anemia	119	197
Equine infectious abortion	28	8
Pullorum disease (Fowl)	1,113	1,051
Bovine tuberculosis	79	123
Equine encephalomyelitis	2	3

#### Rabies Report

The Veterinary Affairs Section, Ministry of Welfare submitted the following report on new cases of rabies in dogs occurring during the period 17 - 23 July.

<u>Prefecture</u>	<u>Number of Cases</u>	<u>Total to date</u>
Tokyo	6	95
Kanagawa	1	25
Chiba	3	70
Saitama	4	52
Ibaraki	0	10
Gumma	No report	40
Tochigi	0	2
Shizuoka	0	1

## SECTION IV

### SUPPLY DIVISION

#### Mission of the American Pharmaceutical Association

The American Pharmaceutical Mission which arrived on 1 July, met with government leaders in public health activities both on the national and the prefectural levels, with leaders in pharmaceutical manufacturing, with leaders in pharmaceutical education, and with leaders in the pharmaceutical professional associations during their 31 day visit to Japan. In addition visits were made to all types of installations concerned with pharmaceutical affairs, including educational institutions, assay laboratories, manufacturing plants, public health facilities such as hospitals, public health centers and private clinics, and visits to practicing pharmacists in private pharmacies and public health facilities.

The members of the Mission were:

Dr. Glenn L. Jenkins	Dean, School of Pharmacy, Purdue University, Lafayette, Indiana, and President of the American Pharmaceutical Association.
Dr. Hugh C. Muldoon	Dean, School of Pharmacy, Duquesne University, Pittsburgh, Pennsylvania
Dr. Troy C. Daniels	Dean, College of Pharmacy, University of California, Medical Center Campus, San Francisco, California
Mr. Don E. Francke	Chief Pharmacist, University Hospital, University of Michigan, Ann Arbor, Michigan, and Editor, Bulletin of the American Society of Hospital Pharmacists.
Mr. F. Royce Franzoni	Practicing pharmacist, Washington, D. C., Member of the District of Columbia Board of Pharmacy and Vice President of the National Association of Boards of Pharmacy

During the period 12 -23 July the Mission made an extensive field inspection trip throughout Western Japan, visiting Hiroshima, Kyushu, Kyoto, Osaka, Nara, Mie, Aichi and Gifu. In all of these places conferences were conducted with local bodies of government officials, pharmaceutical associations, educators, manufacturers groups and others concerned with the practice of pharmacy, including the practical pharmacists in all fields of pharmacy. Inspections were made of as many installations in these places as time permitted.

The Mission departed from Japan, on 31 July, for the United States. They have publicly expressed appreciation to the various Civil Affairs Teams, Japanese Agencies and other individuals who have contributed toward a successful and enjoyable month in Japan.

### Production Summary, January through June 1949

The six month average production of medical supplies and pharmaceuticals reported for January - June exceeded 1948 monthly averages in yen value by 68 percent. Following are quantitative production averages for January through June as compared to 1948 monthly average production:

(1948 Monthly Averages - 1.00)

<u>Commodity</u>	<u>June</u>	<u>January through June</u>
Laboratory Animals (each)	1.31	1.11
Biologics (new production - yen)	1.06	0.25
Penicillin (OU)	5.16	3.67
Hexylresorcinol crystals (kg)	5.26	3.74
Hexylresorcinol capsules (piece)	14.26	6.77
Textile sanitary materials (lb)	0.82	1.23
Rubber sanitary materials (kg)	1.29	1.16
X-ray and electro-therapy equipment (Piece)	1.12	1.12
X-ray tubes (piece)	1.14	1.15
Rodenticides (kg)	No report	0.96
DDT dusters and sprayers (piece)	1.73	0.94
DDT 100% (lb)	2.66	2.44
DDT dust 10% (lb)	2.67	2.08
DDT spray 5% (gal)	1.42	0.85
Dental instruments	1.17	1.27
Surgical instruments	1.50	1.46
Glassware	1.14	1.10

Detailed production tables of the medical, dental, sanitary materials and equipment for May and June, together with monthly averages for the current and previous years for comparison are attached (Incl. No. 1).

### Distribution and Use of Imported Streptomycin Preparation

The following is a report by the Ministry of Welfare of the distribution of the GARIOA imported streptomycin in accordance with PH/JG-103.

#### Report of Streptomycin Distribution (PH/JG-103)

<u>Name and Address of Importer</u>	<u>Quantity Originally on hand</u>	<u>Quantity Shipped</u>	<u>Date of Shipment</u>	<u>To Whom Shipped</u>	<u>Remaining on hand</u>

### SECTION V NARCOTIC CONTROL DIVISION

#### Illegal Cultivation of the Opium Poppy

Illegal cultivation of the opium poppy resulted in the arrest of five defendants in four prefectures. The number of plants cultivated ranged from 30 to 1,100. One of the defendants, a Korean, in addition to cultivating 1,100 plants was in illegal possession of a considerable quantity of narcotics.

## Enforcement

Preliminary reports of the arrests of 27 foreign nationals, all charged with the possession and/or sale of heroin, during July indicate the enforcement program with respect to these traffickers is gaining momentum. The arrests were reported from Tokyo, Yokohama, Osaka, Kobe, Fukuoka and Nagasaki.

In Gifu prefecture 13 traffickers were arrested for illicit dealing in morphine and heroin. Of the defendants who have been tried, three were sentenced to five years hard labor and two were sentenced to two years hard labor. The remainder of the cases are pending.

## SECTION VI

### WELFARE DIVISION

#### Disaster Relief Letter #5

Enclosed with this Weekly Bulletin is a translation of Disaster Relief Letter #5, issued by the Japanese National Red Cross to all Chapters, subject: "Liaison and Coordination of the Work of All Non-Governmental Organization and Individual Engaging in Disaster Relief Work" (Incl. No. 2).

#### Public Assistance Report - May

The Ministry has submitted the following statistical report for the month of May. Figures for April 1949 and for May 1949 are shown for purpose of comparison:

	May 1949	April 1949	May 1948
Persons - non-institutional	1,519,262	1,517,821	2,013,927
Persons - institutional	130,847	133,412	135,944
TOTALS	1,650,109	1,651,233	2,149,871
Assistance - Cash	661,773,531 **	660,104,765*	366,200,622
Assistance - Kind	38,442,214	53,247,114	59,685,650
TOTALS	¥700,215,745 **	¥713,351,879*	¥425,886,272

## Social Studies Reference Book

To introduce Junior High School students to the social welfare programs and agencies of their city the Osaka Municipal Public Welfare Bureau has written a reference book which may be of interest to other prefectures. The contents include chapters on public assistance, care of children of all categories, work with war sufferers and repatriates, hospital and clinic facilities, programs for the unemployed, housing social education, disaster relief, the Red Cross, Community Chest, volunteers and cooperatives.

The first 10,000 copies have been distributed but orders are now being taken for the next issue due off the press on 10 September 1949. Copies are 20 yen a piece and may be obtained by writing to: Investigation Section (Chosa-ka) Public Welfare Bureau, Osaka Municipal Office, Nakanoshima, Kita Ward, Osaka City.

## SECTION VII

### SOCIAL SECURITY DIVISION

#### Social Insurance Coverage for Employees of Labor Unions

On 26 July 1949, the Employment Security Bureau of the Ministry of Labor, with the concurrence of the Ministry of Welfare, issued an instruction ("Shoku-Hatsu" No. 921, dated 7 July 1949) to the effect that since a full-time employee of a labor union is not an employee of the company which employs the union members, and by which he was employed before becoming a full-time employee of the union, the former employer is not obligated under the various social insurance laws for such worker. Since the Labor Union Law prohibits the former employer to pay wages or other compensation to such person who has become a full-time employee of a labor union, his former employment relationship, and any insured status based on such former employment relationship, must be considered as having been terminated. Renewal of the insured status is dependent upon whether the union comes under compulsory coverage provisions of a given social insurance law or, if not compulsorily covered, takes steps to become voluntarily covered. In either case the employer's share of contributions must be borne by the union and not by the former employer.

#### Prefectural Social Insurance Offices and Social Insurance Branch Offices

Each of the 46 prefectures has a section in the prefectural Welfare Department designated as the "Insurance Section" or, in Yamagata Prefecture, more accurately "Social Insurance Section". This office of the prefectural government is concerned with the administration of Health Insurance, Welfare Pension Insurance, and Seamen's Insurance and with supervision of National Health Insurance.

Thirteen prefectural insurance sections have "Social Insurance Branch Offices" which serve given geographical areas within the prefectures with respect to the administration of Health Insurance, Welfare Pension Insurance and Seamen's Insurance. The entire staffs of these branch offices which are subordinate to the chiefs of the

prefectural insurance sections, are national public service employees. All of the members of the staff of the prefectural insurance section, except some of those assigned to the National Health Insurance Sub-section, are national public service employees. Some of the personnel assigned to the National Health Insurance Sub-section are employees of the prefectural government.

The distribution of the 43 currently existing Social Insurance Branch Offices among the 13 prefectures in which such offices are established is as follows:

<u>Prefecture</u>	<u>Number of Branch Offices</u>
Tokyo	9
Osaka	6
Aichi	6
Fukuoka	5
Hyogo	4
Hokkaido	3
Niigata	2
Kanagawa	2
Shizuoka	2
Nagano	1
Hiroshima	1
Yamaguchi	1
Nagasaki	1
Total	<u>43</u>

#### Benefits Paid by the National Public Service Mutual Aid Associations

Reference is made to Public Health and Welfare Bulletin No. 101 for a brief description of the National Public Service Mutual Aid system of social insurance for government and public workers. Benefit data published in that issue of the Bulletin covered the first three months (April through June) of the fiscal year 1948.

Enclosure No. 3 gives benefit data for the remainder of fiscal year 1948 (July 1948 through March 1949). These data are not complete, inasmuch as the Ministerial Associations to-date have failed to submit current reports for October 1948 and the months following. However, this incompleteness affects merely short-term benefit statistics as long-term benefits are paid only by the government Enterprise Associations. (Ministry officials and those of similar government agencies other than business enterprises receive their long-term protection under the Government Pension System).

During the period reported, there have been in existence 27 associations, 20 of the "Ministerial type" and 7 established in the various "government enterprises." At the end of the fiscal year 1948 (31 March 1949), the former accounted for an estimated average of 1.2 million members (880,000 men and 320,000 women), plus 2.3 million dependents, the latter for 1.1 million (940,000 men and 190,000 women) plus 1.8 million dependents.

Since 1 July 1948, the Mutual Aid Associations have discontinued paying any new benefits claimed for job-connected causes but have continued paying those job-connected claims which had arisen prior to that date. (These are given at the end of Inclosure No. 3). New claims for job-connected benefits are currently paid by each individual Ministry pending enactment of a comprehensive workmen's accident compensation scheme for government and public workers.

Effective 1 July 1949, contribution rates levied on government employees who belong to any of the Ministerial Associations have been increased from 2.2 to 2.5 percent of basic salaries. In most of the Government Enterprise Associations the rate remains as before.

Footnotes:

- \*/ Source: Allowance Bureau, Ministry of Finance. All cases and amounts are reported to be those actually paid in the month under review.
- a/ The Japanese fiscal year runs from 1 April to 31 March.
- b/ As far as short-term benefits are concerned, the number of cases is not identical with the number of patients. Renewed incidence of illness requiring treatment in the same person, if occurring in the same month, is counted as two cases.
- c/ The description of individual benefits given below follows the provisions of the National Public Service Mutual Aid Association Law, effective 1 July 1948, and administrative ordinances based thereon. Prior to the effective date of that law, each association made its own benefit provisions. Thus there was an appreciable variety. By and large, the benefit provisions of the new law are more liberal than those in effect prior thereto. One important difference lies in the exclusion of all duty-connected benefits as no longer payable by Mutual Aid associations after 1 July 1948.
- d/ Medical care, including surgical and dental care, and hospitalization provided free of charge to primary insured and at half cost to his dependents for not more than three years for any one illness or injury; also nursing care to the extent the association deems it necessary. In the reports received the type of care given is not broken down. Dependents' medical care, when given in kind is included here. However, more often, the reimbursement provision is said to be applied to dependents, see below.
- e/ Reimbursement for medical care received from other than insurance doctors or institutions and paid for by the insured himself. Reimbursement is made at the rates set by the association but not exceeding actual cost to the insured. Medical care expenses incurred on behalf of dependents are reimbursed at 50 percent thereof.
- f/ Payable to primary insured, beginning with the fourth day of sickness, for as long as he is unable to serve but not more than 60 days - provided he is not paid his regular salary. The rate is 80 percent of daily base pay or, in case hospitalization is provided and the insured has no dependents, 60 percent of daily base pay. In tuberculosis cases the period is extended to three years.
- g/ Also called "delivery allowance." It is payable 42 days before and 42 days after delivery at a rate of 80 percent of the daily base pay.
- h/ Also called "childbirth expense." It is a flat one month's base pay (one-half month's base pay for dependents) paid at childbirth.
- i/ Payable upon childbirth to the insured or dependent at the rate of ¥100 per month for the duration of the nursing period but not exceeding six months. In the reports received no distinction is made between primary insured and dependents among the cases listed.

- i/ A flat one month's base pay but not less than ¥2,000 (one-half month's base pay but not less than ¥1,000 at the death of a dependent) payable to the person holding the funeral for the deceased.
- k/ Consist of two kinds of benefit (1) a death benefit due in cases of death caused by natural disasters and analogous to the ordinary funeral benefit - see footnote j above - but paid in addition thereto; (2) a lump-sum paid to the primary insured who lost part or all of his residence due to natural disaster; the amount varies according to length of service from 1 to 3 months' base pay. In the above listing, all calamity benefits have been lumped together.
- l/ Abolished by the new law. Formerly paid by the Policemen's Mutual Aid Association in respect of primary-school-age children.
- m/ Also called "separation lump-sum." It is paid to a member retiring or separated from the service after, at least, six months' but not more than 20 years' membership. Depending on the length of his service it varies from 10 to 485 times his daily base pay. If he receives also an invalidity allowance, the two allowances combined must not exceed 22 months' base pay.
- n/ Also called "disability lump sum." It is granted to a member covered for at least three months for smaller cases of invalidity or disabling illness continuing after the expiration of the three-year medical care benefit or expenses. It is a flat amount of ten months' base pay and is subject to the above maximum (see foregoing footnote).
- o/ Also called "lump sum for bereaved family." Payable when no survivors qualifying for a survivors pension are left or the deceased was an invalid pensioned prior to completing 20 years of service.
- p/ Also called "separation annuity." Payable to workers retired after at least 20 years' service from the time they reach age 50 until death. The annual pension amount is four times the worker's monthly base pay plus an additional four days' for each year served in excess of twenty.
- q/ Also called "disability annuity." Payable for major invalidity or disabling illness of more than three years' duration on the same qualifying conditions as the invalidity allowance (see footnote n above). Depending on the degree of disability, the annual pension amounts to 4 or 5 times the monthly base pay plus an additional three days' base pay for each year of membership in excess of 10 and an additional 4 days' base pay for each year of membership in excess of 20.
- r/ Also called "annuity for bereaved family." It is paid to the surviving family after death of a member or pensioner insured for 20 years or more and amounts to one-half the retirement pension he was receiving or would have been entitled to receive.
- s/ The new law does provide for a so-called "absence-allowance" payable at the rate of 60 percent of daily base pay for a specified number of days if the member's absence from work for justified reasons enumerated in the law - provided no pay was received for the period of absence. Since the latter provision is seldom realized, the benefit is paid very infrequently. In the above table these have been included with the sickness and injury allowance.

## JAPANESE HOSPITAL REPORT JUNE 1949

Number of Hospitals: The average number of hospitals in Japan in June 1949 (3,015) rose slightly over the number for the previous month (2,970). The average number of tuberculosis sanatoria remained the same (294), as did the average number of mental hospitals (122) and leprosaria (13). The average number of general hospitals rose from 2,541 to 2,586.

Bed Capacity: The average bed capacity of hospitals operating this month was 249,327, slightly lower than the average for last month (249,520). The average daily bed capacity of tuberculosis sanatoria was 54,541 as compared with 54,134 last month. The total number of beds available for tuberculosis patients including those available in general hospitals was 76,612, slightly more than in May (75,641). The bed capacity of mental hospitals was 15,540 as compared with 15,364 the previous month. The total number of beds available for mental patients, including those available in general hospitals, was 17,138 as against 16,918 in May. The bed capacity of leprosaria remained approximately the same, 9,146 in June and 9,145 in May. The bed capacity of general hospitals dropped this month from 170,877 to 170,127 of the total beds available in general hospitals this month, 22,098 (13 percent) were for tuberculosis patients, and 1,598 (1 percent) were for mental patients.

In-Patient Load: The average daily in-patient load of all hospitals in Japan for June was 162,333, as compared to 157,573 in May, an increase of 3 percent. The in-patient load for tuberculosis sanatoria (43,827) was 5 percent higher than last month (41,804); including tuberculosis patients in general hospitals it was 66,057. For mental hospitals the average daily number of in-patients (12,605) was 3 percent higher than the corresponding number in the previous month (12,287); including mental patients in general hospitals it was 14,176. For leprosaria the number of in-patients (8,305) rose 5 percent over May (7,883). For general hospitals the daily in-patient load this month (97,596) increased 2 percent over last month's average (95,599).

Out-Patient Load: The average number of visits reported for out-patient clinic in all hospitals (321,112) increased 5 percent over last month's total (305,299). For tuberculosis sanatoria the number of out-patients decreased 2 percent from a daily average of 4,716 in May to 4,600 in June. For mental hospitals there was a 3 percent decrease, from 495 to 481, and for leprosaria a decrease from 22 to 15. The daily average of out-patients in general hospitals this month (316,016) was 5 percent higher than last month (300,066).

Bed Occupancy: In June, the average daily occupancy of all hospitals amounted to 65.1 percent of bed capacity in Japan, as compared to 63.2 last month. Half (23) of the prefectures reported bed occupancy ratios within 10 percent plus or minus of the national average. In 14 prefectures the occupancy was more than 10 percent below the national figure, including two prefectures (Yamanashi and Saitama) where the rates were more than 20 percent below. Nine prefectures exceeded the national average by more than 10 percent, including Tokyo-to with a ratio over 20 percent higher. For tuberculosis sanatoria the average daily occupancy ratio was 80.4 as compared with 77.2 last month. There was considerable variation in the occupancy ratios. Only 13 fell within a range of 10 percent plus or minus of the national figure. In 21 prefectures the occupancy ratio was more than 10 above the national average and in 12 it was as much below. Yamanashi and Wakayama Prefectures reported ratios (117.2 and 116.2 respectively) more than 40 percent above the national average, while Ishikawa had a ratio (55.7) more than 30 percent below. The daily occupancy ratio for all tuberculosis beds including those in general hospitals was 86.2, as compared with 83.0 last month. Occupancy ratios in mental hospitals also showed considerable variation. For all Japan the ratio was 81.1 as compared to 80.0 last month. Only 13 prefectures had ratios within a range of 10 percent plus or minus of the national average, 19 prefectures had ratios more than 10 percent above, and 12 below. The remaining 2 prefectures have no mental hospitals. Iwate Prefecture had a ratio (173.3) over twice as high as the national average, and the ratios in Toyama (130.6) and Shimane (123.7) were more than 50 percent above the national. At the other extreme, Aomori and Aichi Prefectures, with ratios of 46.5 and 42.0 respectively, were more than 40 percent below the national average. The occupancy ratio for all beds reserved for mental patients including those in general hospitals was 82.7, as compared with 80.5 last month. The occupancy ratio for leprosaria in Japan was 90.8 as compared with 86.2 last month. For the 10 prefectures having

leprosaria, rates ranged for 66.2 in Yamanashi to 114.2 in Shizuoka. For general hospitals the ratio of beds occupied to bed capacity was 57.4 this month as compared to 55.9 in May. Half (23) of the prefecture had ratios within 10 percent plus or minus range of the national figure, 15 were below this range and 8 above. There were 2 prefectures with occupancy ratios over 30 percent below the national ratio -- Saitama (36.8) and Yamanashi (34.9). Tottori Prefecture had a ratio (75.8) over 30 percent above.

## MONTHLY SUMMARY OF VITAL STATISTICS IN JAPAN: MAY, 1949

The attached tables 1 and 2 summarize the vital events for Japan, total "shi" (cities having 30,000 or more population), total "gun" (areas with less than 30,000 population), and each prefecture for the month of May 1949. Rates for live births, deaths (all ages), marriages and divorces are the number of events per 1,000 population estimated as of 1 July 1948 and are worked on an annual basis. Rates for infant deaths (deaths under 1 year of age) and stillbirths are the number of events per 1,000 live births in May.

Live Births: There were 203,738 births in May compared with 220,891 in April.

The birth rate (per 1,000 population per annum) decreased 11 percent from 33.6 last month to 30.0 currently. This was the fourth consecutive month showing a decrease. There was little difference in the May birth rates for the last 3 years, with 30.0 recorded in 1949, 29.7 in 1948, and 30.4 in 1947. However, the current rate was 21 percent greater than the May median rate (24.8) for the 7 year period 1935-1941.

The birth rate of all "shi" combined (29.1) was slightly less than for all "gun" (30.5). Rates among the prefectures ranged from 24.6 in Nara to 40.7 in Aomori. There were 35 prefectural rates within plus or minus 10 percent of the national average, only 5 were higher and 6 were lower.

Deaths (all ages): During May there were 78,768 deaths compared with 84,155 in April. The death rate (per 1,000 population per annum) declined for the last two months. The current decrease was nearly 10 percent, from 12.8 last month to 11.6 this month. The rate for May this year was 5 percent greater than for the corresponding month last year (11.1), but was 17 percent less than that (14.0) recorded in May 1947 and 24 percent less than the May median rate for the 7 year period 1935-1941 (15.3).

The death rate for all "shi" combined was 11.1 compared with 11.9 for all "gun". Prefectural rates ranged from 9.5 in Kanagawa to 15.9 in Toyama. Rates for 30 prefectures were within plus or minus 10 percent of the national average. Five prefectures (Toyama, Iwate, Ishikawa, Aomori, and Niigata) recorded rates more than 20 percent greater than the national figure. An additional 7 prefectures had rates more than 10 percent above the all Japan level. Only 4 prefectures (Kanagawa, Tokyo, Shizuoka, and Tochigi) had rates more than 10 percent below.

Deaths and death rates (per 100,000 population per annum) for the 10 leading causes this month are shown in table 3. A total of 53,306 deaths (2 out of every 3 deaths) was attributed to these 10 causes. Increases over last month's rates were recorded for 5 causes and decreases for 5. The largest increase (nearly 50 percent) was in the measles death rate from 27.2 last month to 40.6 currently. Measles appeared among the 10 leading causes of death for the first time this year, in eighth position. Accidental death was also included among the top causes for the first time, holding seventh place. The 2 diseases included in the leading causes last month which do not appear this month are congenital debility and bronchitis. The death rate for accidents increased 10 percent from 38.6 to 42.3. Smaller increases were recorded for diarrhea, enteritis and ulceration of the intestines, cancer and other malignant tumors, and tuberculosis (all forms). Decreases of from 13 to 25 percent were registered for pneumonia (all forms), senility, diseases of the heart, intracranial lesions of vascular origin, and nephritis (all forms). Compared with May 1948, the current rates were lower for only 3 of these causes: nephritis (all forms) by 15 percent; diarrhea, enteritis and ulceration of the intestines by 12 percent; and tuberculosis (all forms) by 2 percent. The current measles death rate was nearly 4 times as high as that recorded in May 1948. The rate for pneumonia (all forms) was 26 percent greater than the rate in the corresponding month last year, and 5 other causes recorded rates from 3 to 9 percent higher.

Infant deaths: The number of infant deaths in May was the lowest number in any month this year. There were 13,794 compared with 15,944 last month. The infant death rate (per 1,000 live births in the corresponding month) decreased 6 percent from 72.2 to 67.7. The current rate was 19 percent greater than that (56.7) for May 1948 but was 11 percent less than the corresponding 1947 rate (76.1) and more than 30 percent less than the May median rate (97.8) for the 5 year period 1938-1942.

The rate for all "shi" combined (62.3) was 12 percent less than for all "gun" (70.4). Prefectural rates ranged from 117.3 in Ishikawa to 40.0 in Kanagawa. Only 15 prefectures had rates within plus or minus 10 percent of the national average. In 14 prefectures they were higher and in 17 they were lower. Four prefectures (Ishikawa, Iwate, Aomori, and Toyama) had rates more than 50 percent over the national average. Kochi, Tokyo-to, and Kanagawa had rates more than 30 percent lower than the national.

Deaths and death rates (per 1,000 live births in the corresponding month) for the 10 leading causes of infant deaths in May are shown in table 4. These 10 causes accounted for 11,605 deaths or 84 percent of all infant deaths in May. Only 3 increases were recorded over last month's rates (measles, whooping cough, and diarrhea, enteritis and ulceration of the intestines); decreases were recorded for 6 of the causes; and the rate for premature birth remained at 5.0. Measles rose from seventh place among the leading causes last month to fourth place this month. All of the leading causes had higher rates currently than in the corresponding month of 1948 with one exception. The rate for diarrhea, enteritis and ulceration of the intestines was 2 percent less.

Stillbirths: In the current month there were 16,238 stillbirths compared with 15,603 previously. The stillbirth rate (per 1,000 live births in the corresponding month) increased 13 percent from 70.6 to 79.7. This was the highest May stillbirth rate of record since 1920, the first year for which figures are available. It was more than 40 percent greater than the May 1948 rate (56.6) and the May median rate (56.2) for the 7 year period 1935-1941 and more than 60 percent above the May 1947 rate (49.6).

For all "shi" combined the stillbirth rate was 111.9, 76 percent higher than the rate for all "gun" (63.4). Prefectural rates ranged from 109.2 in Tottori to 60.3 in Aomori. More than half (25) of the prefectures had rates within plus or minus 10 percent of the national average. Nine had higher rates and 10 lower. Tottori and Okayama Prefectures had rates over 30 percent higher than the national average. Hokkaido and Aomori had rates more than 20 percent below.

Marriages: There were 83,220 marriages in May compared with 85,271 in April. The rate (per 1,000 population per annum) decreased 5 percent from 13.0 to 12.3. The current rate was less than those recorded in the corresponding months of 1948 (14.0) and 1947 (17.1) but was more than 50 percent higher than in May Median rate (7.8) for the 7 year period 1932-1938.

The marriage rate for all "shi" combined (11.6) was 8 percent less than for all gun (12.6). Rates among the prefectures ranged from 10.0 in Aomori to 16.0 in Yamagata. Thirty-two prefectural rates were within plus or minus 10 percent of the national figure, 9 were higher and 5 were lower.

Divorces: In the current month there were 7,286 divorces compared with 7,164 in April. The rate per 1,000 population per annum remained the same (1.1). The rates for May 1948 and 1947 were 1.1 and 1.2 respectively. The current rate was more than 50 percent greater than the May median rate (0.7) for the 7 year period 1932-1938.

For all "shi" combined the divorce rate was 1.2 and for all gun it was 1.0. Prefectural rates ranged from 0.7 in Ibaraki and Saitama to 1.4 in 4 prefectures (Fukui, Hiroshima, Nagasaki, and Tottori). Twelve prefectural rates were the same as the national figure, 18 were higher and 16 were lower.

DIGEST OF WEEKLY REPORT OF COMMUNICABLE DISEASES  
IN JAPAN FOR THE WEEK ENDED 23 JULY 1949.

During the thirtieth week, ended 23 July 1949, there were reported 20,866 cases of communicable disease compared with 21,420 cases in the preceding week. A few corrections were received for last week, so comparisons in this digest are based upon corrected figures.

Diphtheria cases this week (156) were 16 percent below the number (185) for last week. Current deaths (22), however, were more than twice the previous figure (10). This week's cases were 27 percent higher than in the same period of last year (123) but were 44 percent lower than those (279) recorded for the corresponding 1947 week. Twenty-eight prefectures had fewer cases this week than last week, 11 had more, and 6 did not change. One prefecture (Tottori) recorded no cases in either period. Current cases in Oita and Fukuoka Prefectures numbered 17 and 13 respectively. The 17 cases in Oita represent a marked rise from the previous week's total (5) for the same prefecture. Thirty-seven prefectures had from 1 to 8 cases each, and the 7 remaining prefectures reported no cases. The current and cumulative case rates were 10.2 and 19.9 respectively. The corresponding death rates were 1.4 and 2.0.

Dysentery continued to increase. There were 38 percent more cases this week (1,247) than there were in the preceding week (901), and deaths increased proportionately, from 292 to 403. Current cases were 46 percent higher than those (855) in the same week of 1948 but were 44 percent below the corresponding 1947 total (2,215). Case increased over last week in 37 prefectures and decreased in 9. The largest numeric increase occurred in Saitama Prefecture where cases rose from 90 last week to 165 currently. All decreases were small. Over one-third of all cases this week were in the 3 neighbouring prefectures of Saitama (165), Tokyo-to (161), and Gumma (122). The remaining 43 prefectures had from 2 to 59 cases each. The current and cumulative case rates were 81.3 and 12.8 respectively. Corresponding death rates were 26.3 and 3.7.

The number of typhoid fever cases this week (190) was 11 percent higher than previously (171). Deaths, on the other hand, decreased from 16 to 14. The current case figure was 57 percent less than in the thirtieth week of 1948 (445) and 63 percent lower than the total (514) for the corresponding 1947 period. There were decreases from last week in 19 prefectures and increases in 17. Five prefectures recorded no change, and another five had no cases reported in either week. Current cases ranged from 1 to 19 in each of 38 prefectures. No cases were reported in the remaining 8 prefectures. The current and cumulative case rates were 12.4 and 6.8 respectively. The corresponding death rates were 0.9 and 0.8.

There were 56 paratyphoid fever cases and 3 deaths this week compared with 53 cases and 4 deaths last week. The number of current cases was 45 percent lower than that (101) for the same period of last year and 64 percent below the corresponding 1947 figure (156). Fifteen prefectures had more cases this week than last week, 12 had fewer, and 4 did not change. Fifteen additional prefectures had no cases in either period. This week's cases were distributed among approximately half (22) of the prefectures, which had from 1 to 9 cases each. The current and cumulative case rates were 3.7 and 2.5 respectively. The corresponding death rates were 0.2 and 0.1.

No smallpox cases or deaths were reported this week whereas last week there were one case and one death. In the thirtieth weeks of 1948 and 1947 there were 6 and 2 cases respectively. The cumulative case and death rates as of 23 July 1949 were 0.3 and less than 0.1.

Reports for typhus fever showed 6 cases and no deaths this week compared with 2 cases and 1 death in the previous week. There were 9 and 23 cases respectively in the thirtieth weeks of 1948 and 1947. Three of the current cases were reported by Miyagi Prefecture, and the others were in Osaka, Fukuoka, and Miyazaki Prefectures. The current and cumulative case rates were 0.4 and 0.2 respectively. The cumulative death rate was less than 0.1.

Malaria cases decreased 11 percent, from 194 last week to 173 currently. Deaths increased, from 1 to 4. Cases this week were 21 percent fewer than in the same period of last year (218) and 58 percent below those (411) in the corresponding week of 1947. Cases increased from last week in 17 prefectures, decreased in 13, and did not change in 5. Eleven additional prefectures had no cases in either week. All numeric changes were relatively small except in Shiga Prefecture where cases decreased by 25. Cases in that prefecture this week (124) amounted to 72 percent of the total for Japan, and 23 additional prefectures, with from one to 7 cases each, accounted for the remainder. The current and cumulative case rates were 11.3 and 5.1 respectively.

The corresponding death rates were 0.3 and 0.1.

No Japanese "B" encephalitis was reported this week, and there was also none in the thirtieth weeks of 1948 and 1947. Last week one case and one death were recorded. The cumulative case and death rates as of 23 July 1949 were both less than 0.1.

The number of scarlet fever cases this week (88) decreased slightly from the preceding week (91). Deaths also decreased, from 3 to 1. Current cases were twice those (44) recorded for the same week of last year and more than twice the total (38) for the corresponding 1947 period. Decreases from last week occurred in 14 prefectures, increases in 11, and no change in 1. The other 20 prefectures had no cases in either period. Tokyo-to reported 25 cases this week, and 19 additional prefectures, with from 1 to 9 cases each, reported the remainder. The current and cumulative case rates were 5.7 and 6.3 respectively. The corresponding death rates were both 0.1.

Epidemic meningitis cases (17) decreased by about a third since last week (25). Deaths dropped from 12 to 3 currently. This week's cases were nearly two-thirds of those (26) in the same period of 1948 and were slightly more than half of the corresponding 1947 total (32). Nine prefectures had fewer cases this week than last week, 5 had more, and 7 remained the same. Twenty-five additional prefectures had no cases in either period. Current cases were distributed among 13 prefectures having 1 or 3 cases each. The current and cumulative case rates were 1.1 and 1.9 respectively. The corresponding death rates were 0.2 and 0.5.

There continued to be no cholera or plague.

The number of measles cases decreased 11 percent, from 3,720 last week to 3,322 currently. Cases this week were three and half times those (947) in the thirtieth week of 1948 but were one-fourth less than the total (4,450) recorded in the corresponding 1947 period. Cases decreased from last week in 31 prefectures and increased in 15. Major rises occurred in Nagasaki Prefecture, with 192 cases this week as compared to 95 cases last week, and Aichi, with 301 as compared to 233. Aichi and Hokkaido, with 301 and 281 cases respectively, accounted for about one-sixth of all cases this week. The current and cumulative case rates were 216.6 and 314.0 respectively.

Although whooping cough cases increased 7 percent, from 3,942 last week to 4,208 currently, they did not reach the high figure for the year (4,443) recorded two weeks ago. The total for this week was nearly two and a half times those (1,702) in the same period of last year but was 21 percent below the figure (5,326) for the corresponding week of 1947. Half of the prefectures had increases over last week and half had decreases. The largest numeric changes were increases of from 59 to 84 cases in Aichi, Hiroshima, Saitama, and Shizuoka Prefectures. More than a fifth of all cases occurred in the following 3 prefectures: Tokyo-to (321), Hokkaido (284), and Aichi (263). The current and cumulative case rates were 274.3 and 138.3 respectively.

There were 6 percent fewer tuberculosis cases this week (9,787) than in the preceding week (10,367). Current cases were 26 percent greater than those recorded for the thirtieth weeks of 1948 (7,743) and 1947 (7,783). Cases decreased from last week in 26 prefectures and increased in 20. Prefectural case figures ranged from 32 to 1,158. The current and cumulative case rates were 638.1 and 580.2.

Pneumonia cases decreased further this week. There were 9 percent fewer cases (1,601) than previously (1,753). This week's cases were more than twice those (775) recorded for the same week of last year but were 17 percent less than the corresponding 1947 number (1,925). There were decreases from last week in 31 prefectures, increases in 14, and no change in 1. Hokkaido reported 122 cases this week, and the other 45 prefectures reported from 6 to 74 cases each. The current and cumulative case rates were 104.4 and 215.5 respectively.

The number of influenza cases this week (15) remained about the same as in the previous week (14). In the thirtieth weeks of 1948 and 1947 cases numbered 21 and 180 respectively. There were decreases from last week in 8 prefectures and increases in 7. All other prefectures had no cases during either period. Six of the current cases were in Hokkaido and the remainder occurred in 7 prefectures having 1 or 2 cases each. The current and cumulative case rates for all Japan were 1.0 and 3.8 respectively.

The current and cumulative numbers of syphilis cases were 3,239 and 117,730 respectively; for gonorrhea, 3,189 and 106,876; and for chancroid, 349 and 14,476. All current totals were lower than last week when there were reported 3,805 syphilis cases, 3,902 gonorrhea cases, and 451 chancroid cases. All were also lower than in the same week of last year. At that time there were 3,606 cases of syphilis, 3,598 cases of gonorrhea, and 510 cases of chancroid. The current and cumulative case rates for each of these diseases were: syphilis, 211.2 and 255.8 respectively; gonorrhea, 207.9 and 232.3; and chancroid, 22.8 and 31.5.

NUMBER OF CASES AND CASE RATES OF  
VENEREAL DISEASES IN JAPAN FOR  
COMPARABLE PERIODS, 1947, 1948, 1949

DISEASES	WEEK ENDED			CUMULATIVE NUMBER FOR		
	1949 23 July	1948 24 July	1947 26 July	FIRST 30 WEEKS		
				1949	1948	1947
<u>NUMBER</u>						
CHANCROID	349	510	651	14,476	24,261	23,810
GONORRHEA	3189	3598	4,334	106,876	141,739	118,978
SYPHILIS	3239	3606	2,813	117,730	133,422	81,103
<u>RATE</u>						
CHANCROID	22.8	33.2	43.5	31.5	52.7	53.1
GONORRHEA	207.9	234.6	289.7	232.3	308.0	265.1
SYPHILIS	211.2	235.1	188.0	255.8	289.9	180.7

FOOTNOTES:

1. There were no cases or deaths reported for cholera or plague.
2. Rates are the number of cases or deaths per 100,000 population, estimated as of 1 July 1948 and are computed on an annual basis.
3. A dash ( - ) indicates that no cases or deaths were reported and that the case or death rate was zero.
4. A rate of 0.0 indicates that there were some cases or deaths but that the rate was less than 0.1.
5. "NM" indicates that data are not available.
6. "NR" indicates that no report was received.
7. \* Cumulative figures adjusted for delayed and corrected reports.
